

Higher Accuracy Sales
Forecasting Through
Granular Customer
Segmentation

by Rime Saad **Problem Statement** 

How would the business achieve deeper insight into customer profiles and higher accuracy sales forecasting

### What will be covered in this presentation

- Data cleaning
- Customer cohorts
- Recency, Frequency and Monetary Value and RFM score
- Segmenting customers using kmeans and hierarchical clustering
- Sales Prediction

## The data

### Shape

- 1,067,371 rows and 8 columns
- 5,835 customers and 4,615 products

#### Features and data cleansing:

- InvoiceNumber
- Stockcode
- Description
- Quantity: dealing with negative quantity
- Price: dealing with negative prices
- InvoiceDate
- Customer ID: dealing with nan customers
- Country

#### New feature

Sales = quantity\*price

# **Customer Cohorts**

#### **Benefits**

- Understand how customer behaviors affect the business.
- Reduce customer churn.
- Increase customer lifetime value.
- Increase customer engagement.

#### Monthly Cohort Analysis 100% 35% 33% 42% 38% 36% 38% 34% 34% 36% 42% 50% 38% 28% 24% 30% 26% 30% 28% 26% 26% 31% 30% 100% 21% 32% 32% 27% 31% 27% 23% 29% 32% 30% 18% 23% 18% 20% 15% 24% 21% 20% 20% 25% 20% 25% 2010-01 2010-02 100% 24% 23% 29% 24% 20% 19% 29% 26% 28% 12% 15% 18% 100% 19% 23% 24% 23% 20% 24% 31% 28% 11% 11% 15% 20% 16% 20% 2010-03 2010-04 100% 19% 19% 16% 18% 23% 28% 26% 2010-05 100% 16% 17% 18% 18% 25% 22% 6% 8% 11% 14% 15% 15% 10% 13% 14% 16% 2010-06 100% 18% 19% 21% 23% 29% 9% 8% 11% 10% 14% 15% 12% 11% 12% 139 2010-07 100% 15% 18% 29% 30% 13% 12% 15% 15% 11% 13% 15% 2010-08 100% 20% 29% 33% 17% 12% 10% 13% 14% 12% 13% 12% 15% 17% 17% 20% 2010-09 100% 23% 24% -0.3 2010-10 € 2010-11 100% 2010-12 100% 9% 5% 9% 12% 2011-01 100% 15% 22% 19% 22% 15% 15% 12% 11% 20% 25% 2011-02 100% 16% 17% 19% 22% 16% 16% 15% 15% 2011-03 100% 18% 22% 19% 23% 15% 20% 20% 24% 2011-04 100% 24% 20% 20% 18% 24% 17% 26% 2011-05 100% 24% 24% 16% 21% 20% 26% 2011-06 100% 23% 21% 28% 20% 28% 2011-07 20% 30% 28% 35% 16% 2011-08 100% 26% 29% 26% 17% 2011-09 100% 28% 38% 2011-10 100% 32% 16% 2011-11 100% 2011-12 100% cohort index

# Segmentation Criteria

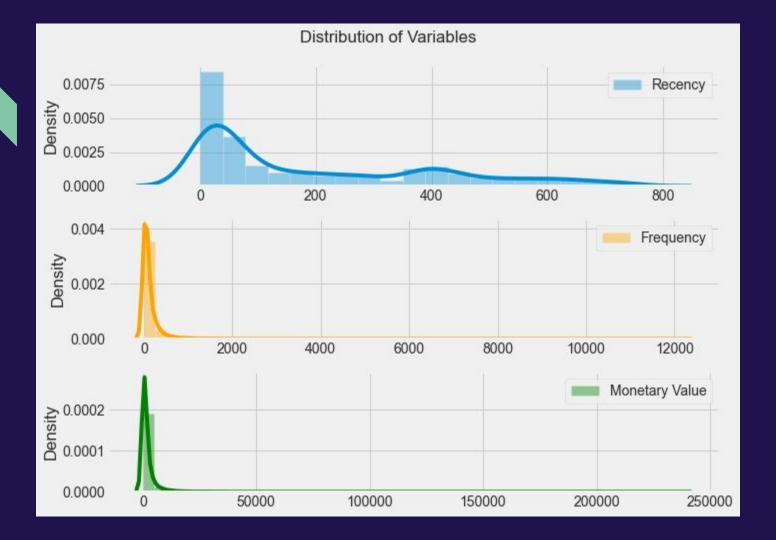

- Recency
- Frequency
- Monetary Value

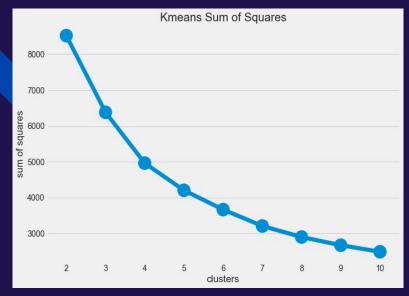

Customer ID	Recency	Frequency	Monetary Value	RFM_segment	RFM_score
12346	529	24	169.36	121	4
12347	2	222	4921.53	444	12
12348	75	46	1658.40	323	8
12349	19	172	3678.69	444	12
12350	310	16	294.40	211	4

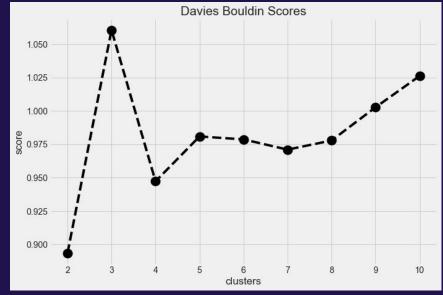

# Clustering

Kmeans

Hierarchical

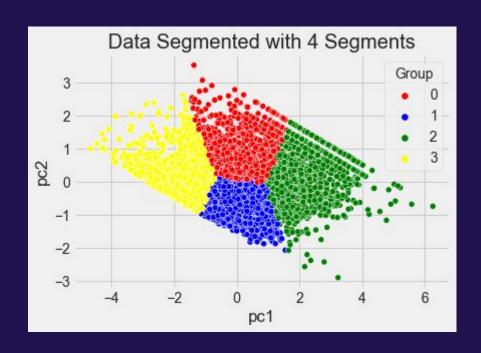

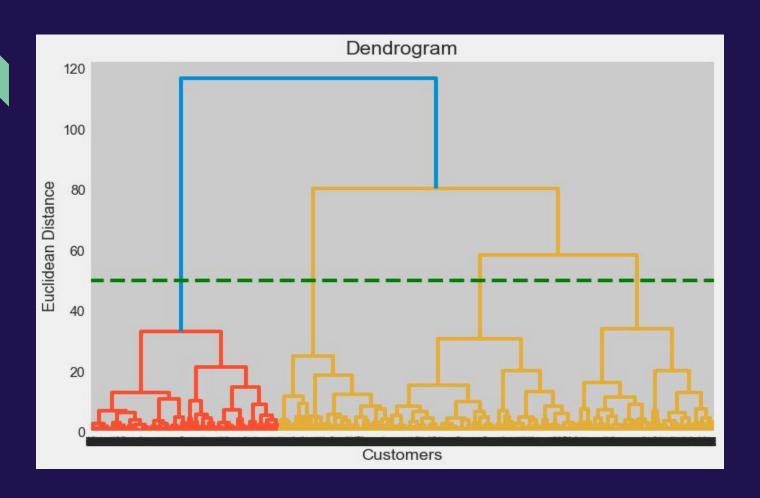

## The four segments after PCA

# Hierarchical Clustering

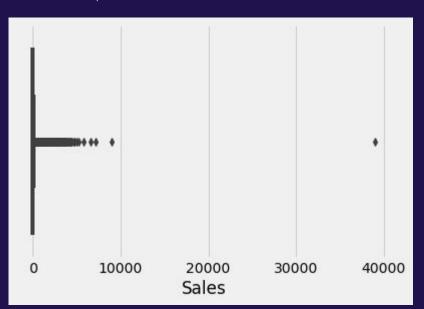

Group	Recency	Frequenc	cy Monetary	Value	
	mean	mean	mean	count	
1	31.0	55.0	770.0	1207	
2	279.0	88.0	1310.0	1568	
3	29.0	395.0	6434.0	1311	Highest value customers
4	386.01	5.0	235.0	1645	<del>-</del>

# Sales Forecasting

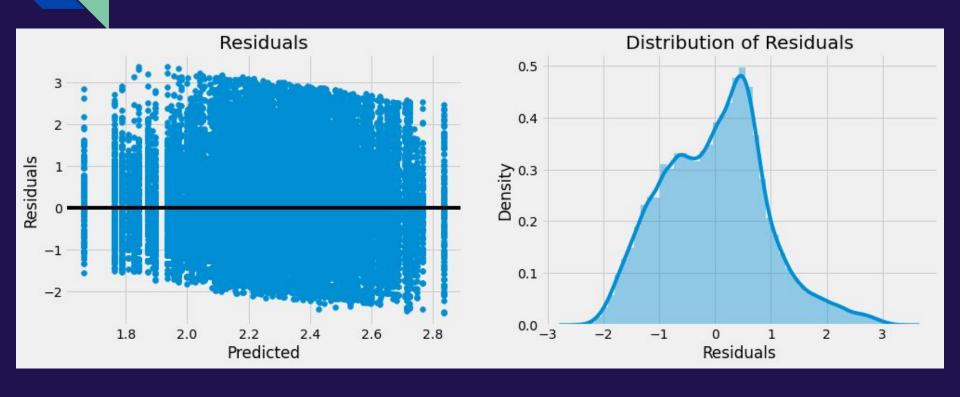

- LinearRegression
- KnearestNeighborRegressor
- RandomForestRegressor
- ARIMA

# Sales

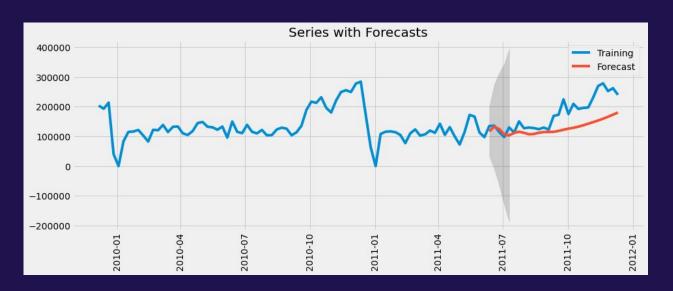

# RandomForestRegressor Residuals

# ARIMA

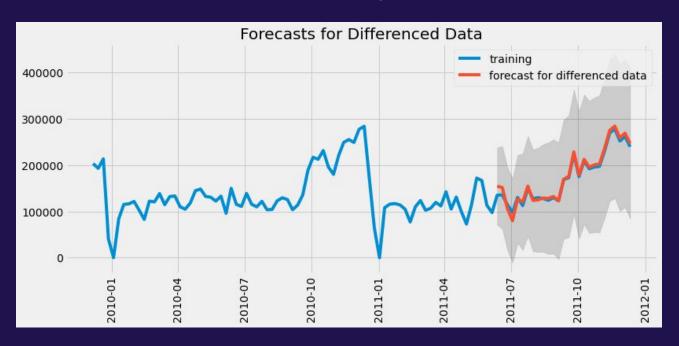

### Parameters to be tuned

- **p** is the number of lags
- d is the minimum number of differencing needed to make the series stationary
- **q** is the number of lagged forecast errors

**RMSE = 47642** 

$$P = 4, d = 0, q = 0$$

**RMSE = 24931**
